

~~Ques~~

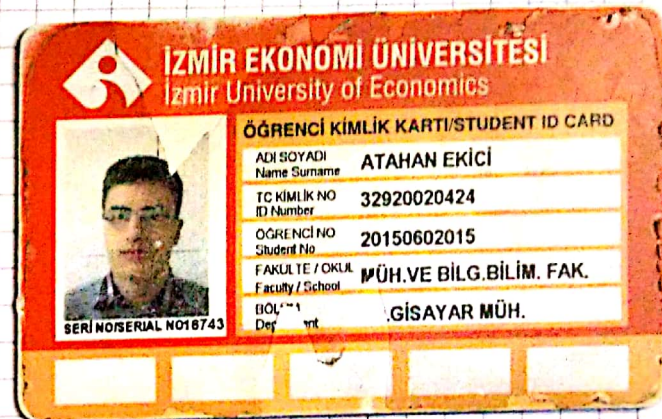

Question-2)

```
public class Car
{
    private String brand;
    private String model;
    static int instance;
```

```
    public Car()
    {
        brand = "default";
        model = "default";
        instance++;
        displayInstance();
    }
```

```
    public Car(String Model)
```

```
    {
        this.model = Model;
        instance++;
        displayInstance();
    }
```

```
public Car(String brand, String model)
```

```
{  
    this.brand = brand;
```

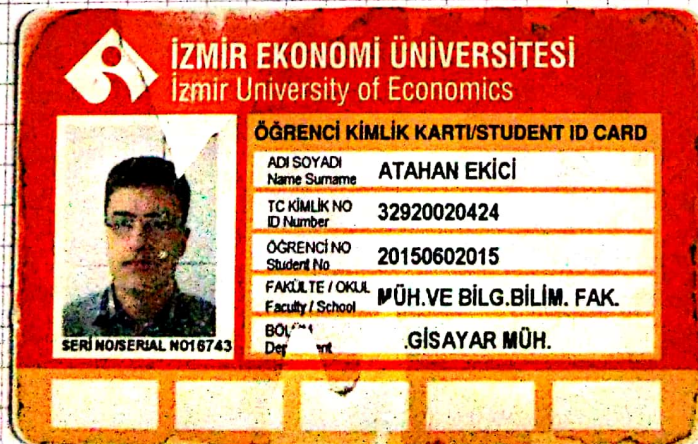

```
    this.model = model;
```

```
    instance++;
```

```
    displayInstance();  
}
```

```
private static void displayInstance()
```

```
{  
    System.out.println(" This is instance : " + instance);  
}
```

```
public class CarTest
```

```
{  
    public static void Main(String[] args)
```

```
{  
    Car x = new Car();
```

```
    Car y = new Car("mm");
```

```
    Car z = new Car("sport", "mm");  
}
```
